Mission

RELY ON IT

SUSTAINABLE AND INNOVATIVE POLYMER SOLUTIONS FOR A BETTER QUALITY OF LIFE

RENOLIT is a leading manufacturer of high-quality plastic films and products.

Our name is a byword throughout the world for technical competence, modern product design and cooperative service. Diverse applications and solutions which are indispensable in all areas of life are made possible by our products.

From furniture fronts and window profiles to swimming pools, from office supplies and self-adhesive products to films and tubes for medical applications, from recyclable panels and composites for the building industry to interior fittings for vehicle interiors - our products boast refining, sealing, protective and stabilising properties as well as a whole range of technical and visual benefits.

As a plastics-processing company, we feel particularly duty-bound to the cause of sustainability and have enshrined this commitment as a core element of our mission statement:

We deliver sustainable and innovative polymer solutions.

These make a vital contribution to our customers' success and improve the quality of life for many people in the most diverse areas. As a business partner or an employer: you can rely on **RENOLIT**. **Rely on it – that is our promise!**

Facts

RELY ON US

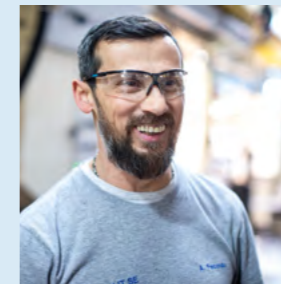

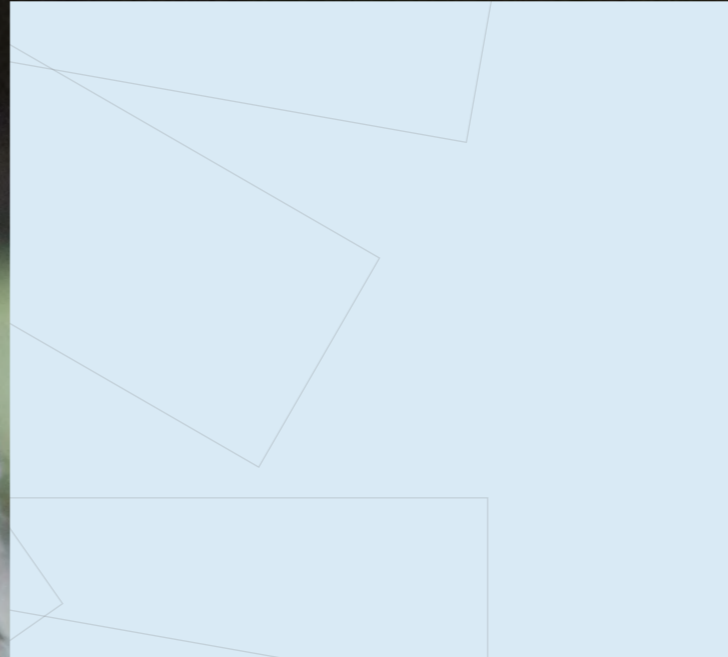

02

**AROUND 5,000 EMPLOYEES,
MORE THAN 30 SITES,
OVER 75 YEARS OF EXPERIENCE,
ONE GOAL!**

Founded as a small firm in 1946, **RENOLIT** has since evolved into a global player of the plastics industry. The original team of 7 has grown into a present-day workforce of around 5,000, based at more than 30 sites in over 20 countries on 4 continents. Our head office remains in Worms to this day.

Our employees' know-how and commitment have made our independent family company a leading specialist in the field of high-quality films, sheeting and other polymer-based products. In 2022 the group achieved a production volume of 263,829 tonnes and reported turnover of 1.366 billion euros.

We aim to continue making a key contribution to our customers' products with premium plastic products. Our expert, dedicated workforce is at the service of companies from diverse sectors of industry, operating in the field at national level and around the world. **Rely on it!**

From Worms into the whole wide world: our employees' broad-ranging know-how allows us to open up dynamic growth markets.

03

Values

RELY ON VALUES

OUR VALUES – ADDED VALUE FOR OUR CUSTOMERS!

Reliable, cooperative, innovative, high-quality, open-minded and sustainable: these brand values define our modus operandi. They shape our corporate culture and embody a commitment to our customers on which we deliver each and every day. Our values are the measures by which you can judge us and our work. Every single one embodies practical benefits – each of our values means added value for you. **Rely on it!**

Reliability

Integrity and commitment have been shaping our business practice for more than 75 years, ensuring that our customers can rely on **RENOLIT's** products and services.

Cooperation

We show respect and trust in our dealings with customers and partners. We apply our expertise to develop sustainable products and services in line with the given requirements.

Innovative drive

Our open innovation culture encourages all employees to play an active role and join forces to develop practicable and attractive innovations for the future.

High quality

Products from **RENOLIT** embody over 75 years of expertise – pure quality that benefits you and your products.

Open-mindedness

Our international set-up with a workforce of over 5,000 employed at more than 30 sites worldwide ensures that we are always close to our customers.

Sustainability

We assume responsibility for a future world that's fit to live in. To this end, we are committed to increasing recycling rates, promote resource-conserving as well as climate-friendly production processes and we are actively involved in numerous sustainability organisations and initiatives.

Firm values provide the foundation for respectful and sincere relations within and outside of the company, with a focus on finding effective solutions every time.

As a family company founded on guiding values, we champion entrepreneurship, individual initiative and a willingness to take on responsibility. All our employees contribute their knowledge and skills in helping us to develop solutions for diverse industries and markets.

True to our commitment to "open-mindedness", we think beyond boundaries and promote diverse teams in which people of different ages and gender and with contrasting cultural backgrounds come together to inspire one another. It is this interplay of different experiences, faculties and skills which opens up new avenues.

A trusting and cooperative working atmosphere in which mutual respect is tangible in our daily work is vital here. Trust and respect provide the foundations for reliable cooperation, both within and outside of the company. As a solution-oriented partner, we work hand-in-hand with our customers. We share our knowledge and experience and support our customers to ensure successful practical implementation.

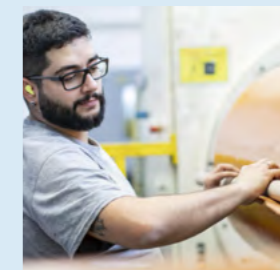

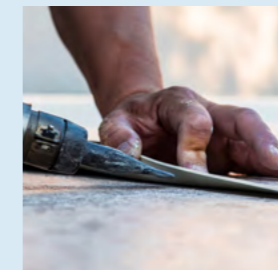

Rely on it!

04

People

RELY ON PERSONAL EXPERTISE

**SUCCESS STEMS FROM
THE INDIVIDUAL EXPERIENCE
AND CAPABILITIES OF EACH
AND EVERY ONE OF US**

Every detail and every step we take is informed by our employees' know-how.

05

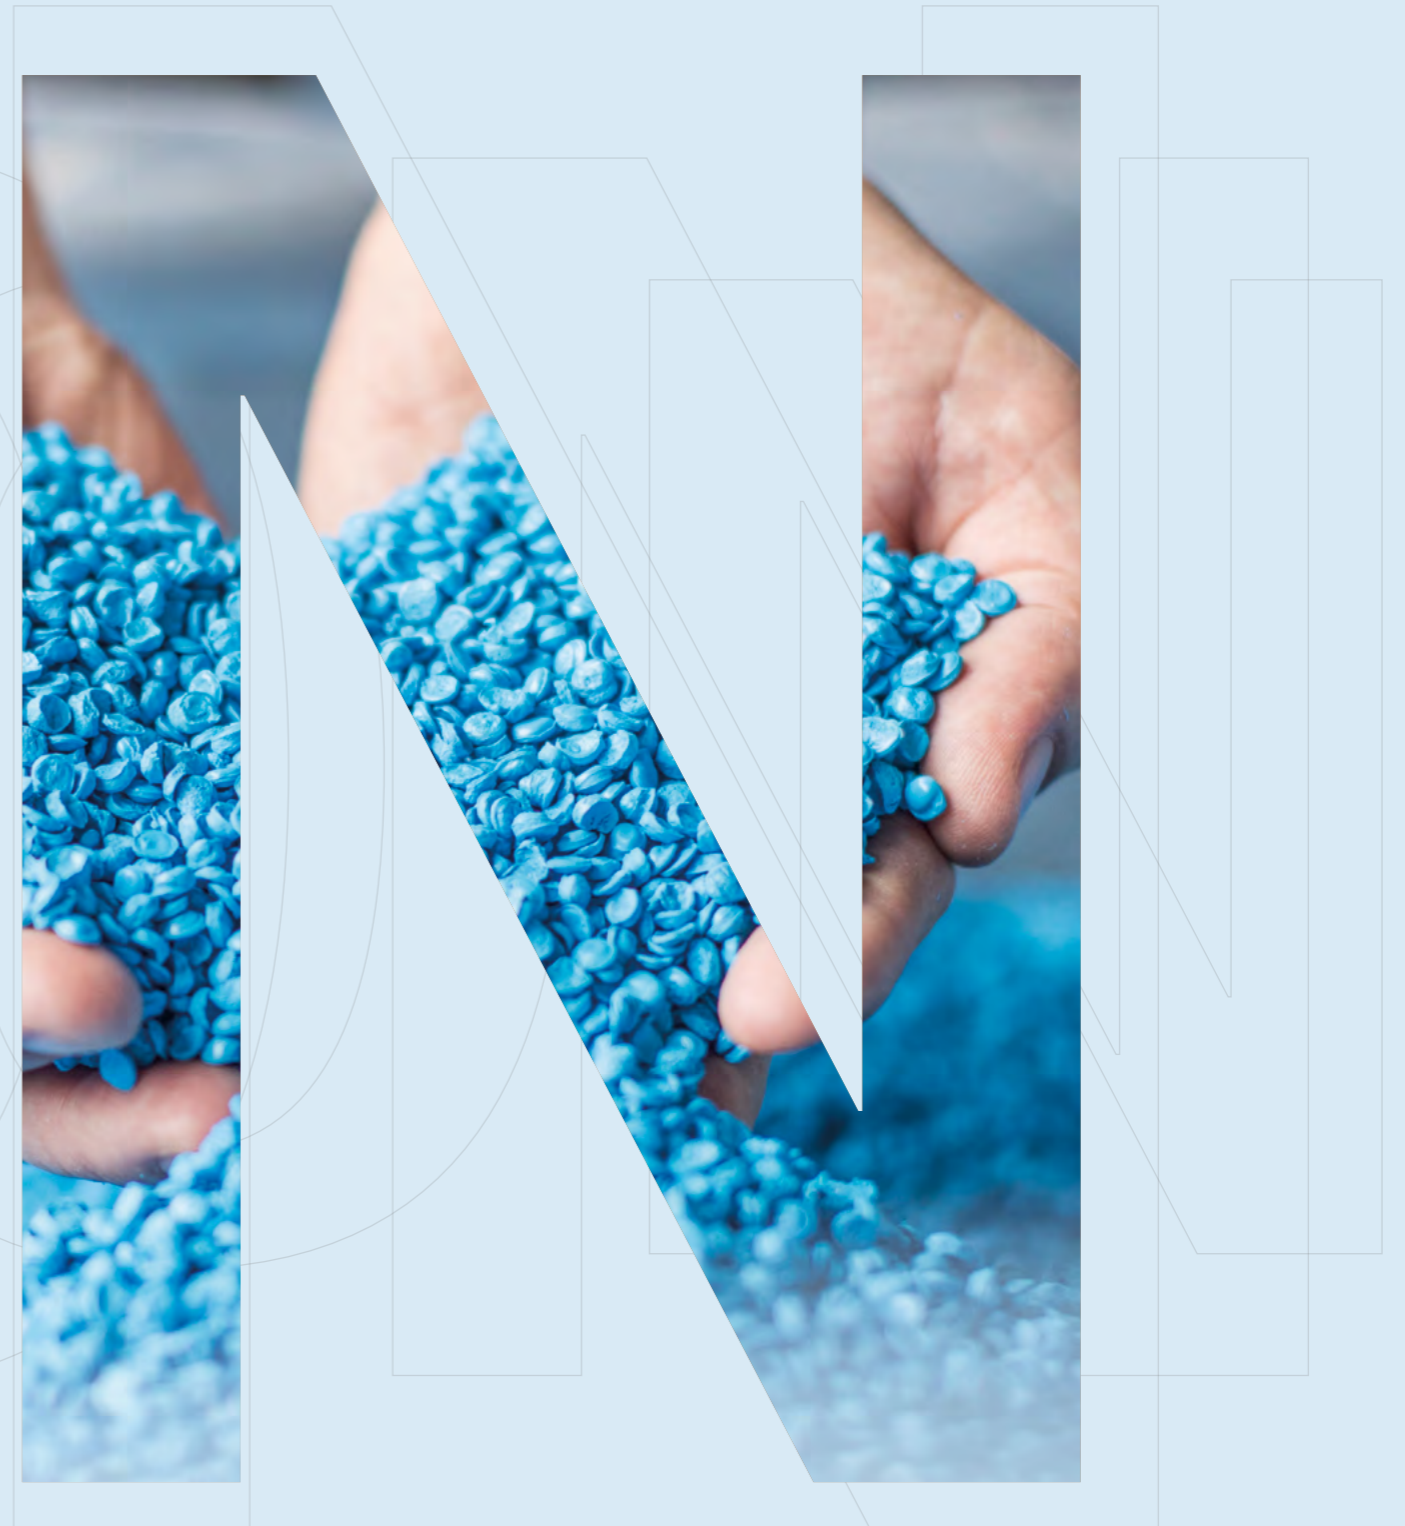

Sustainability

RELY ON SUSTAINABLE INNOVATION

DEVELOPING SUSTAINABLE SOLUTIONS WITH AN OPEN INNOVATION CULTURE

The world is forever changing. We embrace the continual challenge of new developments and actively shape the course of this ongoing process with our products. Sustainability and innovation are crucial elements of our corporate strategy and make a major contribution to our customers' success.

Our activities in this field are many-faceted and take place in various areas, from overarching measures at group level down to the individual market units.

In this way, we are able to identify innovative opportunities at an early juncture and successfully exploit this potential step by step:

- We carry out opportunity scouting to define the strategic direction.
- We apply ideation tools to introduce new ideas into the company.
- We establish innovation projects in new areas.
- Innovation management tools network our employees.
- We strengthen the innovation mindset by means of specific methods and training.

05

Sustainability

RELY ON SUSTAINABLE INNOVATION

Sustainability – for people, our environment and our company

As a driver of innovation, we develop future-proof products for which sustainability is a key selling point. For us, this means that social, ecological and economic objectives must be aligned and pursued with equal priority.

Our sustainability strategy thus pursues the "triple bottom line" approach taking in the three areas of People, Planet and Profit.

People

As a family company we bear a special responsibility for our employees.

Planet

It is our aim to actively help conserve the world's limited resources and to combat climate change.

Profit

As a company acting across generations, we seek to continue our success story in order to remain independent in the future.

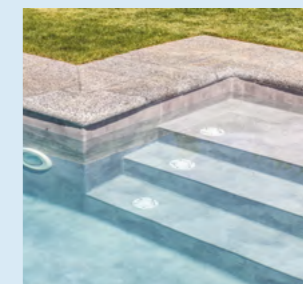

A holistic approach to sustainability

We are committed to furthering the cause of sustainability. Our "RENOLIT Goes Circular" (RGC) initiative, for example, is aimed at avoiding waste, improving internal recycling processes, developing new articles from available recoverable materials and promoting closed-loop internal cycles. At the same time, we are also pursuing our "Zero Accidents" vision with rigour, actively promoting diversity in our workforce, participating in educational partnerships and supporting various cultural and charity projects.

With regard to the economical dimension, we are aiming by 2025 to generate 10 per cent of our total sales from new products and services that also make an ecological contribution. Sustainability will always play a key role in our future-viable products.

Products

RELY ON QUALITY

*A DURABLE MATERIAL
THAT ENABLES
COUNTLESS HIGH-END
APPLICATIONS*

Plastic offers an unparalleled range of fascinating properties: it is extremely flexible, very durable, highly robust and particularly light into the bargain, making it ideal for a multitude of different tasks. Consequently, our products and solutions are used in the most diverse industries, sectors and technologies. By virtue of optimum material properties, the most sustainable production operations possible and sophisticated manufacturing technology, we are able to deliver excellent results for our customers across a uniquely diverse spectrum of applications. **Rely on it!**

RELY ON QUALITY

Home & living

Shaping, designing, cladding, lining, decorating – **RENOLIT** products for interior applications are true all-rounders for all aspects of surface finishing and refinement. From kitchen furniture fronts through bedroom and bathroom furniture to stretch ceilings and flooring, our films offer the highest standards of design and functionality. In addition to home applications, interesting solutions are also available for shopfitting, commercial developments, the office furnishings sector and caravans.

Construction

Resilient, weather-resistant and decorative – high-performance films from **RENOLIT** are used to protect and enhance exterior building components. They embellish window profiles, door panels, facade elements, garage doors, glass surfaces and much more besides. They also serve as reliable sealants for roofing and underground structures and as linings for swimming pools.

Packaging

UV-resistant, durable, dimensionally stable and simple to apply – **RENOLIT** offers a broad spectrum of vinyl films, calendered flexible PVC films, cast PE, PP and polyolefin films for the most diverse applications, from packaging and labelling to refill packs, adhesive tapes, office supplies and clothing for specialised applications.

Printing and media

From calendered flexible PVC films and films for diverse graphic applications to protective and luminescent films or adhesive tapes and labelling – our products are UV-resistant, durable, dimensionally stable and simple to apply. Additional products with permanent surface protection are ideal for poster and digital printing or advertising on vehicles.

Healthcare

Films, tubes, and granules made from medical-grade high-quality polymers are the basis for our Healthcare solutions which make a vital contribution to human health. These value-adding solutions are used by our customers in five areas of application: blood and blood components, biotechnology, IV and pharmacological applications, dialysis, nutrition. In addition, **RENOLIT** Healthcare offers services such as collaborative innovation & sustainability, EMT equipment leasing and custom-made solutions.

Shipbuilding and swimming pools

Film solutions for the shipbuilding sector and the pool industry have to meet the highest standards in terms of stability and durability. The calendered and extruded films manufactured by **RENOLIT** represent innovative and environment-friendly products which are designed for simple and reliable application. The products concerned here include **RENOLIT ALKORFOL STEEL SHIP** as a decorative material for ship interiors and **RENOLIT ALKORPLAN** as the leading brand of synthetic and flexible membranes for lining swimming pools.

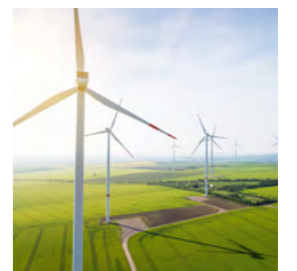

Automotive industry

Special films and sheeting from **RENOLIT** for the automotive sector are all-rounders which are used for protective or design purposes as well as for trim applications. In their various roles, they serve to transport the right message, to protect vehicles' bodywork or to give vehicles a completely new appearance. From digital prints through protective films to polypropylene composites, **RENOLIT** products offer signature top quality and long service lives.

Wind energy

Together with WP Energy, **RENOLIT** is setting new standards in the wind energy industry with new high-performance films for surface protection. Our special products provide lasting and reliable corrosion protection for the steel and metal coatings on the tower of a wind energy plant, while WP Energy possesses the necessary industry-specific expertise and access to the market as an independent provider of inspection, repair and maintenance services.
